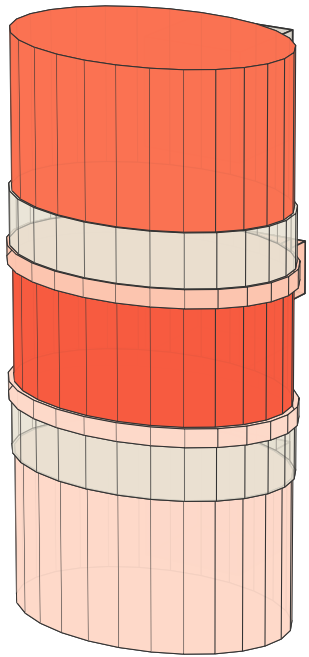
Which local morphology carries level identity (region-occlusion ablation through the deployed head)



Level L3: accuracy drop when the region is masked (intact 90.0%, n=261)

neighbour above: +1.9 pts

superior end-plate: +0.4 pts

target body: +2.3 pts

inferior end-plate: -0.8 pts

posterior elements: +0.4 pts

neighbour below: -1.1 pts

How many bodies the features span

both neighbours masked: +1.5 pts

target body only visible: +1.1 pts

end-plates only visible: -0.4 pts
