The report's recommended geometric detectors, measured
Wigh Q, lowest body [LA]
Q(L5)/Q(L4) [LA]
|wedge|, lowest [LA]
height ratio, lowest [LA]
sacral slope [LA]
L5–S1 gap / height [LA]
width L5 / S1 [LA]
Wigh Q, lowest body [AP]
Q(L5)/Q(L4) [AP]
|wedge|, lowest [AP]
height ratio, lowest [AP]
six-lumbar vs ordinary (n=15)
four-lumbar vs ordinary (n=129)
