Stop
Beethoven starts the trainee's agent on the grid in one click
b Aim 1: the agent writes, runs and repairs
an issue and its gate
Register the gate: rule, threshold, inputs and seed, hashed
Write the Slurm job
Submit; read the scheduler and the job's log
repair from the message: wrong QoS, out of memory, traceback, time limit
gate passes
Open the pull request for the trainee
c Aim 3: labeled 3-D to 2-D
jobs on H200s
labeled CT
physics render
real film
arrow: a sixth lumbar vertebra. The CT and its render are one person; the film is another's
